NAME OF ORGANIZATION	Department of Community Medicine, Parul Institute of Medical Sciences & Research		
FACULTY CONTACT DETAILS	Dr. Shaily Surti (8905292283)		
FACULTY COORDINATOR			

Details about the activity:

On 26th June 2024, 3rd MBBS students visited Sub center Falod with the faculties of Community Medicine as a part of MBBS curriculum. MBBS students must be aware about the public health care system including PHC, CHC, Subcenter etc. Sub centers are considered as the first contact point of the community to the health care system. It is necessary to understand Mamta Day running pattern for the students and visit would be more helpful to understand the different aspects of the health center.

A visit was scheduled in their Clinical posting time table, prior necessary permission was also taken by the department. Students visited the place with one PG resident doctors who helped them to brief on the place.

ANM present there gave the necessary information about the work in Mamta Day. Pregnant women and mothers with young children were registered upon arrival. This helped the staff track attendance and identify priority cases. Weight and height were measured for both mothers and children. This data is crucial for monitoring growth and identifying potential nutritional deficiencies. Pregnant women received checkups from healthcare providers. These checkups likely included blood pressure monitoring, fetal heartbeat monitoring, and discussions on prenatal care. Children were offered routine vaccinations according to their immunization schedule. This helps protect them from preventable diseases. Mothers received counseling on proper nutrition for themselves and their children. This is essential for ensuring healthy pregnancies and child development. Awareness sessions on various maternal and child health topics might have been conducted. These sessions could have covered topics like hygiene, breastfeeding, and common childhood illnesses.

The sub-center staff appeared well-organized and efficient in handling the flow of patients on Mamta Day. The services offered were comprehensive and addressed various aspects of maternal and

PARULUNIVERSITY

child health. There was a positive atmosphere, with healthcare providers interacting kindly and patiently with the mothers and children.

Benefits to Students: Better understanding of Mamta Day, sub center, staff pattern, their function, Infrastructure etc. which was supplemented by visual effect.

Key Features of the event: Prior introduction of Mamta Day was given to the students in the clinical posting. ANM in charge was contacted before hand and necessary permissions were taken. Visit was facilitated by the PG resident doctors to help more briefing.

Venue: Sub Center – Falod, Waghodia, Vadodara

Date: 26/06/2024

Time: 9:30 am to 12:00 pm

Outcome/Feedback:

MBBS students were satisfied with the visit and the teaching in the field with positive feedback.
